Dustin Jamner

Boston, MA

dustin@jamner.net
jamner.net

Education

Massachusetts Institute of Technology. Cambridge, MA — September 2020 - October 2026
Department of Electrical Engineering & Computer Science
PhD Student in Computer Science
Master of Science in Electrical Engineering and Computer Science — May 2022
Advisor: Adam Chlipala

Northeastern University. Boston, MA — May 2020
Khoury College of Computer Sciences
Bachelor of Science in Computer Science
Minor in Mathematics

Publications

1. Dustin Jamner, Tilek Askerbekov, and Adam Chlipala.
   Verified E-Graphs for Automating Compiler Verification
   To appear in *the 54th ACM SIGPLAN Symposium on Principles of Programming Languages (POPL '27)*.
   Mexico City, Mexico. January 2027.

2. Jon Rosario, Dustin Jamner, Adam Chlipala, and Andres Erbsen.
   Efficient Proof Engines with Lambda-DAGs
   To appear in *the 54th ACM SIGPLAN Symposium on Principles of Programming Languages (POPL '27)*.
   Mexico City, Mexico. January 2027.

3. Dustin Jamner, Gabriel Kammer, Ritam Nag, and Adam Chlipala.
   Pyrosome: Verified Compilation for Modular Metatheory
   In *the International Conference on Object-Oriented Programming, Systems, Languages & Applications (OOPSLA '25)*. Singapore. October 2025.

4. Andres Erbsen, Jade Philipoom, Dustin Jamner, Ashley Lin, Samuel Gruetter, Clément Pit-Claudel, and Adam Chlipala.
   Foundational Integration Verification of a Cryptographic Server In *the ACM SIGPLAN Conference on Programming Language Design and Implementation (PLDI '24)*. Copenhagen, Denmark. June 2024.

5. Dustin Jamner, Gabriel Kammer, and Adam Chlipala.
   Pyrosome: A Framework for Modular, Extensible, Equivalence-Preserving Compilation.
   In *the Ninth International Workshop on Coq for PL (CoqPL 2023)*. Boston, Massachusetts, USA. January 2023. Workshop talk.

6. Clément Pit-Claudel, Jade Philipoom, Dustin Jamner, Andres Erbsen, Adam Chlipala.
   Relational Compilation for Performance-Critical Applications.
   In *the ACM SIGPLAN Conference on Programming Language Design and Implementation (PLDI '22)*. San Diego, California, USA. June 2022.

7. Max New, Dustin Jamner, and Amal Ahmed.
   Graduality and Parametricity: Together Again for the First Time.
   In *the 47th ACM SIGPLAN Symposium on Principles of Programming Languages (POPL '20)*. New Orleans, Louisiana, United States. January 2020.

8. Chris Casinghino, Michael Dixon, Jt Paasch, Cody Roux, John Altidor and Dustin Jamner.
   Using Binary Analysis Frameworks: The Case for BAP and angr.
   In *the 11th Annual NASA Formal Methods Symposium (NFM 2019)*. Houston, Texas, USA. May 2019.

9. Amal Ahmed, Dustin Jamner, Jeremy Siek, and Philip Wadler.
   Theorems for Free for Free: Parametricity With and Without Types.
   In *the 22nd ACM SIGPLAN International Conference on Functional Programming (ICFP '17)*, Oxford, UK, September 2017.

Awards

OOPSLA Distinguished Artifact Reviewer 2025

National Science Foundation Graduate Research Fellowship 2020

Robert M. (1941) and Jacqueline M. Fano Fellowship, *MIT* September 2020 - May 2021

Khoury Research Award, *Northeastern University* May 2020

Summer Scholars Independent Research Fellowship, *Northeastern University* July - August 2019

Provost's Advanced Research/Creative Endeavor Award, *Northeastern University* May 2016

Dean's Scholarship, *Northeastern University* September 2015 - April 2020

Teaching

Massachusetts Institute of Technology. Cambridge, MA
Teaching Assistant: Formal Reasoning About Programs Spring 2023
Held office hours, designed and graded homework, and covered lecture in the professor's absence.

Northeastern University. Boston, MA
Teaching Assistant September 2016 - April 2020
Software Development (Fall 2019): Graded students' in-class code reviews and homework and held office hours.
Programming Languages (Fall 2018, Spring 2020): Held office hours, graded homework, exams, and students' in-class code reviews, and proctored exams.
Logic and Computation (Fall 2016, Spring 2017, Summer 2017, Fall 2017, Spring 2019): Led students' lab sections reviewing course material and supervised other teaching assistants. Created homework assignments and proofread the instructor's assignments. Held office hours and graded homework and exams.

Service And Mentorship

OOPSLA Artifact Evaluation Committee 2025

MIT PL Review, Program Committee 2025, 2026

MIT PL Review, Program Chair 2023, 2024
Co-founded the MIT PL Review with a committee of MIT PhD students to highlight recent developments that we believe have significant potential to shape the future direction of PL research and/or industry practice.

ICFP Artifact Evaluation Committee 2023, 2024

Undergraduate Research Opportunity Mentor MIT, Spring 2022-July 2026
Mentored 10 undergraduate researchers and 2 MEng researchers and guided them through contributing meaningful improvements to group research projects.

Graduate Application Assistance Program Mentor MIT, Fall 2020 - 2024
Mentored a total of 13 students from underrepresented groups in preparing their graduate applications to MIT.

Honors Alumni Mentor Northeastern University, 2020-2022
Mentored 2 undergraduate students in 2020, 1 in 2021, and 1 in 2022, including discussing preparation for graduate school and the tradeoffs between academic and industry careers.

Experience

Axiom Math. Palo Alto, CA (Remote)
Member of Techinical Staff July 2026 - Present
Working on AI-driven software verification at scale.

Amazon Web Services. Seattle, WA
Applied Scientist Intern June - September 2022
Worked on reasoning tools for automatically checking critical properties of existing service code.

Northeastern University. Boston, MA
Research Assistant (Full-Time) Summer 2016, January - July 2017, January - June 2019
Solved a decade old open problem by developing the first proof of parametricity, an information hiding property, for a polymorphic, gradual language. In subsequent work, designed a novel language and proved both parametricity and graduality for it via translation to a static language and a logical relation on target terms.

The Charles Stark Draper Laboratory, Inc. Cambridge, MA
Formal Methods Developer January - July 2018
Implemented a value-set static analysis for binaries (`https://github.com/draperlaboratory/cbat_tools`). Proved a disassembly target language type-safe in the Coq proof assistant.

Promenade Software. Irvine, CA
Software Development Intern July - August 2014, July - August 2016
Implemented a Python scripting system within a web interface for medical devices in the Parlay software package (`https://promenadesoftware.com/parlaytm`).

Invited Talks

Extensible and Automated Compiler Verification Galois, April 2026
Technical Talk
Presented an introduction to Pyrosome and my in-progress e-graph automation.

E-Graphs for Automatic Compiler Verification MIT, March 2026
DARPA MOCHA PI Meeting
Presented my in-progress e-graph automation for compiler correctness in Pyrosome.

Pyrosome: Verified Compilation for Modular Metatheory
Northeastern University October 2025
Harvard University September 2025
Brown University September 2025
Tufts University September 2025
UC Berkeley August 2025
UC San Diego August 2025
University of Southern California August 2025
Presented an extended talk based on my paper of the same name.

Introduction to Category Theory Sage Hill School, January 2018
Guest Lecture, Advanced Topics in Mathematics
Presented an introductory lecture on category theory for students studying basic group theory.

Relational Parametricity for the Polymorphic Blame Calculus Northeastern University, June 2017
Northeastern University Programming Language Seminar
Presented research on proving parametricity for a gradually typed language with polymorphism.

Abstract Interpretation via Galois Connections Sage Hill School, March 2017
Guest Lecture, Advanced Topics in Mathematics
Presented Galois connections and their use in soundly approximating uncomputable properties.

Introduction to Constructive Logic and Type Theory Sage Hill School, March 2016
Guest Lecture, Advanced Topics in Mathematics
Presented introductory material on constructive logic and basic type theory.
